

BYOD Charging Locker Bank

Charging Locker Banks for Laptops, Chromebooks, iPads, Tablets and more

High density, floor standing mobile device charging lockers with power sockets integrated into each locker compartment and a wide variety of lock options from RFID access cards, combination locks to just keys.

Key features:

- Locker compartment size suitable for laptops, Chromebooks, iPads, tablets and smartphones (please check dimensions before ordering).
- 16 or 20 bay locker module which can be combined with additional locker modules to create a locker bank
- Metal base frame with adjustable feet
- Sloped and vented top
- Options of mains power socket, dual USB power socket or both in each locker compartment, with space to store device AC adapters and cables
- High quality compact laminate doors and shelves
- Lock options include key, mechanical combination (with key override), digital code (with single or multi-user “hotel safe” settings and mastercode override) and RFID access card
- Other design options on request
